

NICHOLAS TROMBOUKIS

SKILLS

Languages: Java, Python, HTML, CSS, JavaScript
Frameworks/Libraries: Django, Flask, Knockout, jQuery
Other: PostgreSQL, Socket.io, Git, Arduino, Adobe CC

OBJECTIVE

Through countless hours of debugging, code reviewing, and developing software I have gained not only callused fingertips but the skillset to land me a position as a software engineer and finally move out of my parent's basement.

EXPERIENCE

Code Reviewer | Udacity | Jan 2015 – Current

Helping students write efficient and effective code through project reviews. Conducted 1000+ code reviews while maintaining a 4-star quality rating.

Frontend Developer | C.L.D. | Feb 2014 – Dec 2014

Managed and developed projects to create an in house front-end framework, resulting in a 40% increase in efficiency saving the company money.

PROJECTS

Neighborhood Map: Map of my favorite Speakeasy bars in NYC. Used Google Maps and Foursquare APIs, utilized jQuery and organized with knockout.js.

Conference Planning: Platform where users can create and join conferences. Built using Python on Google App Engine.

EDUCATION

Full Stack Developer Nanodegree | Jan 2017 | Udacity

Gained proficiency in modern full stack technologies and techniques by completing 8 diverse projects.
